MGA DASHBOARDS & MI REPORTING

The evolving landscape of delegated underwriting demands greater alignment between MGAs and their risk carriers. As regulatory scrutiny increases and competition intensifies, effective management of underwriting risk, pricing adequacy, data quality and performance monitoring is more crucial than ever. A lack of robust actuarial governance can lead to poor loss ratios, capacity withdrawals, and reputational setbacks.

At Finalyse, our MGA and Risk Carrier Support offering is designed to strengthen these relationships by embedding actuarial rigour, transparent reporting, and data driven insights.

Finalyse supports MGAs and capacity providers by delivering tailored services across the insurance value chain, ensuring transparency, accountability, and long-term profitability.

## Benefits

- Manage technical pricing, underwriting support, and product development.
- Implement data strategy and actuarial modelling for delegated business.
- Manage reserving and capital projections for portfolio oversight.
- Handle regulatory reporting, solvency monitoring, and governance frameworks
- Integrate actuarial tools and automation into MGA workflows.

## Motivation

- Finalyse offers end-to-end actuarial and risk management support tailored specifically for MGAs and risk carriers – empowering them to operate with greater precision, confidence, and regulatory alignment.
- With deep cross-functional knowledge of insurance, reinsurance, and delegated authority ecosystems, Finalyse is uniquely positioned to help MGAs scale responsibility, improve profitability, and maintain strong relationships with capacity providers and regulators.
- Finalyse can support MGAs and risk carriers at every stage – from launch and growth to optimisation and exit – or in targeted areas depending on strategic needs.
